

StartUp Europe Awards recognizes the best European startups in 10 categories

- The President of the European Parliament has opened the final ceremony of StartUp Europe Awards 2016 at the European Parliament.
- This initiative is organized by the StartUp Europe Accelerator by Finnova Foundation
- Robocamp, Tespack, INZMO, Windcity, NeuronGuard, VyzVoice, CityCrop, TempBuddy, Waynabox and APSU have been awarded as the best startups in Europe according to 10 categories.
- The “Best Public Administration for startups Award” has gone to the Lisbon City Council, the Consorcio Zona Franca de Vigo and the Central Denmark Region, to recognize their effort in supporting entrepreneurship in their respective territories.

Brussels, June 8, 2017. The StartUp Europe Awards initiative, promoted by the European Commission, supported by the President of the Committee of the Regions and implemented by the StartUp Europe Accelerator by Finnova Foundation, have recognised for the first time the best startups in Europe in 10 categories, in the so-called “Eurovision for startups”. The **President of the European Parliament, Antonio Tajani**, opened the final ceremony of Start-up Europe Awards 2016. “We should cultivate good ideas and help them to grow. We need to invest more in digital technologies and create a genuine European single market where our young companies can develop”, assured Tajani.

[StartUp Europe Awards](#) presents a prize methodology for startups at local, regional and national level, fostering the open innovation and the collaboration between the different actors of the European ecosystems, through the private-public partnership to support entrepreneurs. “Besides, it creates a network of contacts that will allow to inspire and give visibility to all the local startups so that, by using this network, they can scale their services and products at a global level”, has stated the Director of Finnova's Startup Europe Accelerator, **Juanma Revuelta**.

The European winners of StartUp Europe Awards 2016 according to the 10 categories are: **Robocamp** (Creative Category), **Tespack** (Energy), **INZMO** (Fintech), **Windcity** (Green), **NeuronGuard** (Health), **VyzVoice** (ICT), **CityCrop** (Smart Cities), **TempBuddy** (Social), **Waynabox** (Tourism) and **APSU** (Water). **Ekuore** (Health), **Human Surge** (Social) and **APATEQ** (Water) have received the Extraordinary Awards, a special prizes created to recognise the effort of those startups whose score was very high and got very close to the final recognition.

The startup **Audified Reality** from Former Yugoslav Republic of Macedonia (FYROM) won the “Best European Neighbour StartUp Europe Award”.

Waynabox received a **European acceleration ticket of 10,000 €** from Amadeus Company, to continue their internationalization in 2018, delivered by **Elizabeth Aston**, Senior Adviser, Industry Affairs. “Amadeus continually invests in innovation with a total spend of over 4 billion during the last 10 years. Innovation is about doing things differently – having a different business model, a different approach to customer service, and this is what Waynabox does” stated Aston.

The startup **APSU** also received a **European acceleration ticket of 10.000 €** for presenting their project to different European calls as LIFE or EUROSTARS. The award has been delivered by Rafael Páez Santana, Counsellor of innovation and Employment from Cabildo de Fuerteventura.

The Commissioner of Investigation, Science and Innovation, **Carlos Moedas**, handed the award of ICT Category to **VyzVoice**. “I want to create the kind of environment where the entrepreneurial spirit can flourish... Entrepreneurs are the stars, we’re there to help and support them”, said Moedas in his motivational speech.

The Vice-President for Communication of the European Economic and Social Committee, **Gonçalo Lobo Xavier**, who handed the award for Fintech and Tourism categories, considers “StartUp Europe Awards a very interesting way to promote entrepreneurship and the quality of the work developed in Europe. We have very good examples of solutions that can change peoples' lives for the better and this is a huge achievement when we talk about innovation, science and entrepreneurship: to address the citizens!”

StartUp Europe Awards delivered the recognition to the “**Best Public Administration for the Startups**”, a pioneering prize which aims to recognise the best programmes or public services supporting entrepreneurs and innovation in municipality, province and region categories. The winner in Municipality category is **Lisbon City Council**; in the province category is **Consorcio Zona Franca de Vigo** and in the Region category is **Central Denmark Region**.

The awards were handed by the first Vice-President of the Committee of the Regions, **Karl-Heinz Lambertz** who stated “the European Committee of the Regions encourages cities and regions to implement entrepreneurship-friendly policies through our European Entrepreneurial Region (EER) initiative. We actively promote and support efforts to create smarter EU cities and regions”.

The president of the European Parliament, **Alberto Tajani**, handed the award to the “**Best Media Partner**” to the **TV Program Emprende of Spanish Television (RTVE)** for their commitment to the dissemination of the entrepreneurship and the startups.

Finally, the Ambassador of Spain in Belgium, Cecilia Yuste, handed the award to Jesus Brotons "Brainiac Beats", winner of the Music Contest Award, for creating the music for StartUp Europe Awards, representing the values of union, community and entrepreneurship.

The winners of StartUp Europe Awards will obtain great visibility all around Europe thanks to the Media Partner Alliance of StartUp Europe Awards formed by 21 media members. The startups will also have access to a programme of mentoring (information in internationalization, European funds like SMEs Instrument of **50.000 € to 2, 5 million €** of non-refundable subsidy, international communication, legal barriers to innovation, etc.), through the StartUp Europe Accelerator of Finnova Foundation, which will allow them to boost their projects and to make them more viable worldwide.

StartUp Europe Accelerator is the unique accelerator specialized in European opportunities funding, which helps the entrepreneurs to internationalize their business through European projects.

Thanks to the initiative StartUp Europe Awards, the winning startups will be able to participate in business missions focused in internationalization in India, Africa, LATAM and Silicon Valley.

To close the ceremony, the president of the organisation "Mind the Bridge", **Alberto Onetti**, presented the last report of "Scaleup Europe" by Startup Europe Partnership (SEP). This report includes new data about Scaleups and capital raised in Europe, plus a comparison among regions, countries and sectors. The maturity of the EU scene, the potential impact of Brexit, and recent growth ends the report, along with a survey of the largest verticals present in Scaleup Europe, and which countries these verticals are most represented in.

About StartUp Europe Awards

StartUp Europe Awards is an initiative that seeks to identify and recognise local models of success which become an example to other entrepreneurs, to the public administrations for developing custom-made programmes to stimulate its growth and to the investors for approaching local ecosystems.

"From the Commission, we want that entrepreneurship generating growth and employment is not only present in a few cities or regions. Thus, more people can benefit from the impact" assures Isidro Laso, Head of StartUp Europe's Sector – European Commission.

More than 20 local events and 14 national awards have been celebrated under StartUp Europe Awards' frame in 2016, with 91 startups winners and 84 that made it to the final. 21 media partners of the whole Europe, as The Independent in Ireland or Emprrende TVE in Spain, they have helped to give visibility to this initiative. 9 members of the European Parliament have come

together in the StartUp Europe Awards as ambassadors, supporting the local events with their presence and following closely the progress of the startups.

StartUp Europe Awards is an initiative promoted by the European Commission and it is supported by the President of the Committee of the Regions, several members of the European Parliament as Ambassadors and implemented by the Finnova Foundation in collaboration with Startup Europe.

Energy:

Tespack
Country: FINLAND
www.tespack.com

Tespack is a company specialized in the future of wearables, focusing on the most important part of technology: energy generation on-the-go. We have launched our first product line, Tespack Smartpacks, so you would never lose your power again. Simply collect your energy from the sun, store it in one of our powerful mobile chargers and charge all your devices, even laptops, on the move. Our products are currently available in retail stores such as Intersports in Finland, Scandinavian Outdoor Store, Microsoft Store and Vodafone online store in the Netherlands. We work closely with bigger brands and companies such as TomTom and our products are currently being used and tested by military special forces and the UN. We also cooperate with universities in Amsterdam, Helsinki and London.

Green:

Windcity
Country: ITALY
www.windcity.it

Our vision is "Variable Geometry for Variable Wind", and we pursue it through our patented disruptive energy conversion concept which allows us to maximize production in any variable wind. Thanks to Windcity's simple mechanics technology, we are able to harvest up to 80% more energy compared to competitors.

We contribute to a shift towards the Circular Economy by recovering and exploiting a relevant yet so far underestimated class of wind, that of variable wind. Our arms are designed to adjust the blades' radius and inclination, allowing our turbine to work in complete autonomy without the need of any additional energy source.

Windcity turbines are particularly suited for urban and suburban areas, where wind streams are disrupted by cities' orography while, at the same time, being generated by vehicular flows. By recovering such wasted resource into energy, we strive to turn cities into sustainable realities.

Health:

NeuronGuard

Country: ITALY

www.neuronguard.com

Neuron Guard is a life-saving medical device with the aim to revolutionize the treatment of brain damages and improve the life of patients, with also a significant reduction of healthcare costs.

The Acute Brain Damage is one of the most emerging challenges of modern Emergency Medicine. We have to act soon because after just 8 minutes a portion of the brain is irreversibly compromised. Early on-site treatment is the key to protect the brain.

The solution is composed by a cooling/warming collar powered by a smart control unit (the size of a small briefcase). The collar transforms the neck into a natural heat exchanger. It is quicker to act on brain tissue but can also function as total body temperature adjusting device if required. The control unit collects all the data of the treatment and transmits them to the Emergency Response System. We are the only NON-INVASIVE DEVICE capable of both COOLING and WARMING.

Tourism:

Waynabox

Country: SPAIN

www.waynabox.com

Waynabox is the startup winner in TOURISM Category from Spain that has revolutionized the tourism industry through a new experience focalized on the emotions. To begin, you must go to the website, indicate the number of travellers, and choose the leaving airport and the number of days of your trip. Also, you have the possibility of deleting the cities that you do not want to visit. Two days before flying, they will reveal your destination, flights and housing and they will deliver an exclusive trip guide.

Our desire is to offer emotions and we realized that the best way to do so is through surprise trips. That's why our mission is to revolutionize the traditional way of travelling and offer to all you young spirits a new and surprising plan to break your routines and live a great experience.

This Program allows identify and channel all the resources and tools of the ecosystem (public and private), with the objective of making them available to the goals of the entrepreneurs, to accompany them in their validation, implementation, financing and maturation.

Contact: tete@zonafrancavigo.com

- **Region: Central Denmark Region**

<http://www.centraldenmark.eu/english/centraldenmarkandmidjutland/>

The Game Hub Scandinavia project is the successor of Scandinavian Game Developers that won the Regio Star Awards 2015 in the Smart Growth category. The project created 53 new companies and more than 200 jobs in the partnership. Besides, in Denmark alone, it attracted around 60 million DKK in external investments, as a municipal guarantee convinced a local building society and local developers, that the infrastructure around the incubator would be a worthwhile investment opportunity. The Game Hub Scandinavia project has set an even more ambitious goal: from delivering actual change to becoming "the pebble that starts the avalanche". One of the indicators of success in the project has been to create 398 new jobs, 100 new companies as well

as establishing business and educational business relationships with China to open up the Chinese market to the game developers of the project incubators.
